

Next Meeting is May 20th.

Potluck at Noon, Meeting at 1:00 p.m.

We hope you can make it to this meeting. We have quite a bit we want to discuss.

Anyone that has equipment on the museum grounds should plan to attend our meeting. We will be discussing cleaning up of the buildings that the club owns and rearranging things so the tractors and equipment can be easily seen when museum tours are active.

We will also be talking about the August pioneer power show and what we can do to help the museum with the show.

Quite a few of our members have been helping the museum with their car shows and also their tours.

We're always happy to see everyone. Please come and enjoy our noon potluck and our meeting (we'll try to keep the meeting short).

Rose Parker: President C.W.A.F.E. CLUB

HOME MADE ICE CREAM YUM!YUM!

What could be better than home made ice cream on a very warm fall day at the Fair with all the people enjoying the rides, the animals and the Fair food. Well maybe getting to lick the "dasher" or paddle used to make ice cream. There is only one place on the Fair grounds for home made ice cream and that is at the "motor display".

Here we are at our Fair display with the motors chugging away and the wood stove cooking our dinner. Now we need to plan for our dessert. How about home made ice cream?

Dub and Donna Everett had a rare five gallon ice cream freezer that was made to belt up to one of the motors that would turn the freezer and the container filled with the cream mixture. With the right amount of ice and salt to keep the right consistency of the ice cream in about 30 minutes we had ice cream.

Anytime we made ice cream the word seem to get around and pretty soon there was a long line at the fence waiting for the big event of uncapping the container pulling out the dasher and start dishing up. Well this particular day the line started early and everyone was anxious to see the results. The word even spread to the Fair office and here came several of the office workers to get in line for their treat.

One of our members remembered he had a large package of ice cream cones at home that he had had for a while and we could have them. Being that he lived close he decided to get the cones and be back before the ice cream was done.

Finally the time had come for the big event. Home made ice cream usually melts fast and everyone was licking the cones and a lot was running down the arms to the elbows and some even had a milk mustache. Almost all the ice cream had been served and it was now time for us to relax and enjoy our own cones. As we reached to the bottom of the cone box we noticed a lot of crumbs but wait what are those little black things. Oh no! It can't be but yes it was. The cones were more than a few days old and the weevils had moved in. We felt terrible but no one complained about the raisins in their ice cream.

Rose...

Do I take the old or the new.

Boise, Idaho invited us to their annual State Fair and of course we couldn't say no. So along with our friends Dub and Donna Everett of White Salmon, Wa. We loaded as much of our equipment and motors on a two-ton farm truck and two pick ups and we headed for Idaho.

We were a sight to see, with a big banner down the side of the truck that said "Idaho or bust." The trucks were packed and anything we could get to fit we stuffed in a nook or cranny after all we wanted to put on a good show. This was the first time for the Idaho fair to have a motor display. We were slightly overloaded and along the way we had to stop at the weigh station. The officers were dumfounded at what we had on the truck and had to know what all the motors were. They were so enthusiastic that they forgot to weigh us and waved us on and said have a good time.

Now ten days at the fair is a long time and we decided instead of packing so many clothes we would do our own laundry. Now we had a choice, we could use the 1903 Maytag washer or the more modern one that we belted up to a small one cylinder motor. We chose the more modern. We were really modern as we had a "wringer" to get all the water out of the clothes. We even had a clothes line and of course the enclosure around the display made a great place to hang clothes. Our display looked like someone that had been hiding out in the hills somewhere.

Just to keep things interesting we went to the Goodwill store and bought two ladies bra's and made one bra with three cups in it. There is no limit to our imagination and we had lots of laughs and lots of lookers.

Enclosed are pictures of the Maytag and the more modern machine. This was in 1981.

Don't you love the style of the 80's with the "bell bottom" pants.
